Lighthouse Investment Partners Modernizes Global Technology Infrastructure through Strategic Collaboration with SS&C

April 14, 2026

WINDSOR, Conn.--(BUSINESS WIRE)--Apr. 14, 2026-- SS&C Technologies Holdings, Inc. (Nasdaq: SSNC) today announced that Lighthouse Investment Partners has modernized key elements of its technology infrastructure with SS&C's Managed IT Services. The initiative supports Lighthouse's long-term technology strategy to enhance operational scalability, strengthen cybersecurity capabilities, and streamline global technology operations.

"This transformation delivers a unified operating model to support our global workforce while simplifying technology management and strengthening security," said Rob Swan, Chief Operating Officer at Lighthouse Investment Partners. "Partnering with SS&C allows us to scale with confidence while focusing on our core business."

As part of the program, Lighthouse migrated key infrastructure components to SS&C's private cloud platform and implemented a globally distributed desktop environment. The infrastructure modernization program was implemented in phases during 2025 and early 2026. As part of the initiative, the firm deployed a globally resilient desktop platform supporting more than 350 employees across North America, EMEA and APAC.

Lighthouse continues to manage its technology strategy, governance and vendor oversight while leveraging SS&C's managed services infrastructure. The firm also uses SS&C GlobeOp to support fund administration, middle- and back-office operations, investor services and regulatory reporting across its platform.

"We are pleased to extend our relationship with Lighthouse," said Anthony Caiafa, Chief Technology Officer at SS&C Technologies. "SS&C Managed IT Services supports growing organizations with standardized processes, expanded engineering depth, and consistent service delivery. Our single integrated operating model aligns management of infrastructure, end-user computing, and core IT services to improve accountability, transparency, and long-term operational efficiency."
